COMPANY PROFILE

Committed to exceptional performance ///

Welcome to Stardom Engineering

Stardom is a leading world class specialist engineering company providing maintenance, modernization and process equipment products and services.

Our purpose is to work in long term relationships to develop and add value to our clients' capital assets in a flexible and collaborative manner. We provide custom designed engineering solutions to suit your specific needs supported by our in-house global delivery model which includes emerging market sourcing. We strive for excellence by focusing on the following client outcomes:

Zero harm safety

- Aligning with your vision, mission and values
- Reducing whole of life costs
- Delivering ongoing constant improvement outcomes
- Providing state of the art technology
- Delivering Projects / Services on time, to cost and to specification safely

Our Background

Stardom Engineering Established in Abu Dhabi, United Arab Emirates and operating various industries we have developed in-house expertise and capability to provide our clients with specialist engineering services for their whole of life operational requirements. Our reputation is built on our commitment to exceptional performance providing the advantage of a one-stop shop with end-to-end in-house service capability.

We have extensive knowledge and experience in the following industry sectors:

- Ship Repair and Maintenance
- Oil & Gas (Onshore and Offshore)
- Reverse Engineering Products
- Power Generation (Renewables and Thermal)
- Mining (Mines, Processing and Ports)
- Manufacturing & Processing Industries
- Defense Engineering Products

Permanent Locations

Our permanent facilities are located in close proximity to our clients operations nationally in United Arab Emirates, ME and Africa We provide an extensive range of specialist industrial products and services within our regional and International market area including emerging market sourcing from our facility in China, India.

Products & Services

We can provide individual service offerings or custom designed packaged service and supply arrangements to meet your specific requirements. We deliver a full range of services locally through our extensive branch network including workshops at each location

Our core group service offerings include Site Maintenance Services

Shutdowns Engineering Products, Materials & Spares

Workshop Services Engineering & Technical Services Technology & Projects

Products, Materials & Spares

We supply a large range of products, materials and spares to support your plant and equipment maintenance needs. Process equipment products are distributed from our local branch network.

Our product range includes:

- Fluid Power (Hydraulics & Pneumatics), Ancillary Products including Hose & Fittings
- Filtration
- Process Valves, Controls, Automation & Actuation and Instrumentation
- OEM Spares for the Timber and Aluminium Smelting Industry
- Kempe Manufactured Spares and Assemblies
- Specialist Industry Spares (e.g Brake Components, Material Handling)

Process Equipment Products

Process Equipment branch supplied products and spares can be purchased over the counter or provided, as required, through specialist contract arrangements.

We distribute directly from our regional branches which hold appropriate inventory dependent on your service requirements and contract arrangements.

MRO Spares and Materials

MRO (Maintenance, Repair and Operational) spares and materials are supplied from our warehouse and distribution centres located in Melbourne, Australia and Wuxi, China directly into your operations store.

Order management, including central processing, is undertaken from our Head Office in Geelong.

Additional spares and materials range provided through our MRO delivery model include:

- Transmission (Major) i.e. Gear Box and Motors etc
- Pumps
- Material Handling
- Electrical
- Other Specialised Engineering Products

Valves

We offer procurement management of valves and actuator that is technically based with design engineers, production engineers, valve technologists, and QA/QC personnel. Quality, safety, and customer service remain the highest priority to us. We monitor our manufacturers and suppliers to ensure they meet these same high standards, not only for stardom Engineering, but also for our customers.

We would be proud to earn your business and become partners in the industry. Allow us the opportunity to serve you. You will experience first class service along with best in class products. Stardom Engineering is your valve and automation connection to the world.

Stardom Engineering is positioned as a major supplier of all types of valves for all major projects procurement needs covering:

- Floating Ball Valves
- Compact Ball Valves
- Split Body Side Entry Ball Valves
- Welded Body Side Entry
- Top Entry Valves
- Subsea Ball Valves
- Subsea Actuators
- 3Way Ball Valves
- Cryogenic Ball Valves
- Gate Valves
- SDV Valves
- Check Valves
- Globe Valves
- Butterfly Valves
- Custom Made Valves
- Needle Valves
- Double Block Bleed Valves
- Manifold Valves

NOTE

We do this through a global network of reputable buying houses and original equipment manufacturers OEMs with whom we have strategic alliances incorporating our well-developed supply chain process.

OCTG, SEAMLESS LINE PIPES & DRILLING EQUIP

- Carbon Steels / Carbon – Manganese (ASTM A206) Low temperature carbon steel (ASTM A33)
- Alloy steels (ASTM A335)
- Stainless steel (ASTM A312) Line pipes (API 5L)
- High yield line pipes for sour/non-sour applications (API 5L)
- Welded Pipes (ERW, HFI, EFW, DSAW)
- Carbon steels / Carbon–Manganese (ASTM A672) Low temperature carbon steels (ASTM A671)
- Alloy steels (ASTM A691)
- Stainless steels (ASTM A213/A358)
- Line pipes (API 5L)
- High yield line pipes for sour/non-sour applications (API 5L) Structural Steels
- Seamless and welded tubular
- Cans & Plates
- Shaped plates with prepared edges
- Sections
- Wide flange beams
- Complete piles
- Pile sleeves
- Conductor pipes
- Prefabricated components

NOTE

Stardom Engineering supply carbon steel and stainless steel pipes and tubular to all international Standards such as ASTM, ASME, API, EN and DIN. Please find above an overview of materials that can be supplied in ASTM grades (for reference only). Equivalent DIN and other international grades can also be supplied.

Fittings/ Flanges

Stardom Engineering Limited provides different sizes of flanges/fittings from 1/2" to 60", ANSI classes 150lbs to 2500lbs API6D & API6A and API 2000 to API 20000 in Carbon Steel, Stainless Steel, Duplex Steel, Super Duplex Steel, Alloy Steel, Incoloy-Monel, Titanium etc.

- Butt-weld Elbows, Tees, Reducers, Caps to ASME B16.9 and 16.28
- Forged Fittings to ASME B16.11
- Weld Neck, Long Weld Neck, Socket Weld, Blind, Slip On, Orifice Flanges in all pressure ratings, with Raised Face,
- Flat Face or Ring Type Joint as required to ASME B16.5 & 16.47
- Specifications: ASTM, BS, NF, EN/DIN and special customer requirements
- Materials: Carbon/Low temperature, Alloy, Stainless, Copper-nickel alloys
- Manufacturing process: Forged, Wrought, Welded, and Fabricated. We provide Equipment & Material specification for various materials needed for projects and will provide the necessary processes to support contracts formulation and vendor selection.

Instrumentation & Flow Control Products

- We provide extensive services in Process control, instrumentation and electrical fields
- Provision of AutoCAD drawings services for existing systems and electrical wiring diagram.
- This will allow you to know shutdown requirements and save time and manpower during maintenance.
- Installation and maintenance of differential pressure gauges, temperature and pressure transmitters on delivery and flow lines
- Installation of instrument and control panels, enunciators panels, etc.
- Installation and maintenance of differential pressure gauge pressure and temperature, transmitters, on delivery and flows line:
- Recorders, controllers on metering skids
- Fire detection and alarm synchronizing system
- Telemeter equipment, solenoids, relays
- Calibration and recalibration of instruments

Rotating Equipment (Pumps & Compressors)

Stardom Engineering services is in the business of procuring, marketing and servicing pumps of quality brand names. The company's product line includes: Single stage liquid ring vacuum pumps, Two-stage liquid ring vacuum pumps, Liquid ring compressors, Rotary vane vacuum pumps, single stage centrifugal pumps, multi-stage centrifugal pumps, multistage self-priming pumps, full engineered vacuum systems and compressors.

- Fire water pumps
- High Pressure Reciprocating Pumps
- High-speed centrifugal pumps
- Dosing pumps
- High-speed compressors
- API pumps

NOTE

Our rotating equipment serves worldwide hydrocarbon and chemical processing, pulp and paper, power generation, and the food and beverage markets. Aftermarket services include spare parts, overhaul, repair as well as engineering and commissioning of rotating equipment and technical support

Heavy Machinery and Parts

There is need for us to live in societies were we can co-exist with other life forms and nature – much of our socio-economic and scientific activities threaten the ecological balance in our world. Of note is the unflinching human demand for land and energy; various activities employed in attaining and exploiting resource; and the development and utility of anti-ecology machinery, product and techniques. Amidst these challenges is the search for cleaner air, save environment and endangered species. Stardom Engineering is developing a fund base – DECT: Stardom Engineering Eco-Care Trust – with the aim of providing funding on ecological care. Our dedication to nature preservation and balance is also a public campaign support and corporate pledge. We abide by international HSE standards in business activities and corporate services on and off oil field service, onshore and offshore, Defense, Power. It is a necessity and common goal to work or a safe and healthy society. Life is all about balance. It is intricate and dynamic.

Wellhead Christmas Tree/accessories

- Sps electrical wellhead penetrator system and all related Components.
- Grease for valve
- Wellhead equipment
- Christmas tree valve
- Blow out preventer
- Choke manifolds
- Drill Pipe, Drill Collar
- Tubing and casing
- Drill Bits & Drilling Equipment' s
- Oil Spill Containment Products – Booms, Skimmers & Sorbents etc

Industrial Generator, parts Supply & Service Support

Reverse Engineering and workshop services

Workshop Services

All our branches have in-house workshops which provide core services including:

- Machine Shop
- Fabrication and Welding
- Jobbing Shop Works
- Small Projects
- Workshop Repairs and Rotables
- Breakdown Workshop Services
- Assembly and Commissioning
- Spare Parts Repair
- Repair of Sub-Assemblies

Specialist Services

Our branch network provide additional specialist workshop services both locally and nationally which include:

- Fluid Power
 - Component Repair
 - Cylinder and Actuator Repair
 - Hydraulic Hose Assembly and Testing
- Hydraulic, Lubrication and Fluid Remediation
- Filtration and Fluid Conditioning Equipment
- Valve Repair and Testing
- Stainless Steel Manufacturing
- Precision Engineering Component Manufacture
- Hard-Facing
- Pressure Parts and Pressure Vessel Manufacture

- Piping Spools and Assemblies
- Spare Part Manufacture
- Heavy Machining
- CNC Machining
- Oil & Gas Pressure Parts
- Chutes, Bins and Hoppers
- Equipment Manufacturing
- Pre-Assembly and Workshop Testing and Commissioning of Sub-Assemblies
- Kempe Manufactured Products
- Fabricated Structures and Conveying Assemblies
- Robotic Welding

Site Maintenance Services

Our local branch network provide highly skilled personnel who have the ability to support your outsourced site maintenance and repair requirements.

Services are delivered by our low cost value proposition.

Site Maintenance Services include:

- Embedded Maintenance Activities
- Preventive, Predictive and Breakdown Repair Maintenance Works
- Specialist, highly skilled and experienced supplementary and ad hoc labour
- Recurring Maintenance Tasks
- Specialist Site Services including Fluid Power

Shutdowns

We specialise in providing shutdown services from our branch network with our highly skilled personnel both locally and nationally who have the ability to support your requirements by providing a complete service package including:

- Planning and Scheduling
- Supervision, Labour and Material Supply
- Utilisation of Local Labour
- Upgrading and Commissioning of Equipment
- Supply of Equipment and Cranage
- Planned Maintenance Outages

Services Support at a Glance

INSPECTION SERVICES

Stardom Engineering specializes in maintenance inspections performing nondestructive testing (NDT) inspection on all down-hole drilling inventory ranging from OCTG & drill pipes, crown to the drill bits. All of Stardom Engineering inspector trained on the job and certified

ROPE ACCESS SERVICES

Stardom Engineering Services specialises in supply and installation of process control instrumentation products and electrical products. We undertake the following in the electrical fields in both the Hazardous and nonhazardous environment

SURFACE PROTECTION

With industry leading expertise, rope access is an intrinsically safe form of access for working at height or areas that are difficult to reach with traditional forms of access. Furthermore, the nature of rope access reduces project time, lowering downtime and minimizing the impact on ongoing operations.

OVERHAUL/INSTALLATION & COMMISSIONING

Stardom Engineering has extensive knowledge and practical experience in the various techniques available for surface preparation and associated protective surface preparation and protective coating application methods to meet required industry quality standards

OFFSHORE/ONSHORE CRANE MAINTENANCE

Stardom Engineering, supplies crane parts and carry out crane services. Crane parts and services are available for ship cranes, offshore cranes and mobile cranes. Stardom Engineering also provide hydraulic repairs for crane pumps and motors as well as crane winch and crane gearbox repairs. Offshore crane sales and marine crane sales also available

OFFSHORE/ONSHORE CRANE MAINTENANCE

Stardom Engineering has developed a range of technologies and methods using automated and semi-automated tank cleaning heads, vacuum transfer systems and other pumping solutions to clean tanks and vessels either remotely or with minimum man entry.

PROCUREMENT/ CONTRACTUAL SUPPORT

We are OEM distributor for a variety of world-class oil industry products and equipment and offer post installation after sales service with provision for in country stock holding/inventory for prompt or Just-in-time delivery of critical service spares. We have the reach and means to procure materials from around the globe through a wide supplier/stockiest network worldwide

Inspection Services

Stardom Engineering Services LLLC specializes in maintenance inspections performing nondestructive testing (NDT) inspection on all down-hole drilling inventory ranging from OCTG & drill pipes, crown to The drill bits. All Stardom Engineering inspectors are API certified.

INSPECTION SERVICES PROVIDED

- Magnetic Particle Inspection (MPI)
- Day Penetrant Inspection (DPI)
- Eddy Current Inspection (ECI)
- Boro-scope Inspection
- Radiography Hardness Testing
- None Distructive Testing (NDT)

OCTG INSPECTION SERVICES

- Bottom hole assembly inspection (A.P.I. / DS-1)
- Drill Pipe Inspection (A.P.I. / DS-1 / NS-2)
- Riser Inspection (A.P.I.)
- Casing Inspection (A.P.I.)

Rope Access Services

Industrial rope access has been developed by IRATA (Industrial Rope Access Trade Association) over the last 25 years. The safety and ease of access has elevated rope access to a point where it is the chosen means of access for much of the work in the offshore oil and gas industry as well as a range of projects in construction, civil engineering, and much more.

Stardom Engineering success is based on thorough training and strict work guidelines that deliver an unrivalled safe working record year after year.

With industry leading expertise, rope access is an intrinsically safe form of access for working at height or areas that are difficult to reach with traditional forms of access.

Furthermore, the nature of rope access reduces project time, lowering downtime and minimizing the impact on ongoing operations, Significantly reducing the cost to clients in comparison to traditional methods.

Rope Access has brought tremendous benefits to our customers. All of our experienced personnel are IRATA qualified, ensuring that work is carried out in a safe, reliable manner.

Stardom Engineering technicians are not only trained in access, but are multi-disciplinary operatives. Services offered can range from maintenance services such as coatings and insulation, to specialist services such as Non-Destructive Testing (NDT), inspections and plant integrity

Our IRATA Qualified Tradesmen Include

- Painters
- Blasters
- Pipe Work Inspector
- Spipe Fitters
- NDT Technicians And Inspectors
- Welders And Fabricators
- Riggers
- Insulators
- Electricians
- Plumbers
- General Maintenance Engineers

Surface Protection Services

Stardom Engineering Oilfield Services Limited has extensive knowledge and practical experience in the various techniques available for surface preparation and associated protective surface preparation and protective coating application methods to meet required industry quality standards.

We own an extensive inventory of equipment including semi –automated propriety systems enabling us to undertake surface preparation by means of UHP water jetting (Hydro–blasting), abrasive (wet and dry) blasting and mechanical methods including dust–free and recyclable options. Once prepared, we can apply a range of coating and composites including industrial epoxies, alkyds and urethanes, non–slip helideck and coatings, screeds and tiles, tank and vessel linings and anti–fouling coatings by means of conventional spray, airless spray or manual brush roller application as appropriate. Integrity.

Our core in–house capabilities and project management skills give us the ability to provide integrated solutions and to deliver turnkey painting programs for our clients as they combat corrosion and maintain their assets integrity.

Offshore Surface Protection

Reliability of our surface protection products, performance and services is key to all aspects of our operations. We are confident that We have the specialist technical skills, resources and capabilities to excel in service delivery.

Our capability includes surface protection, passing fire protection, composite wraps and repair technology, technical support, pre–survey work and cost containment.

We have the resource capability to mobilize qualified supervision and inspectors. Our highly skilled labour force consist of leading experts in their fields and are fully conversant in dry and wet blasting offshore techniques and painting offshore also.

Tank Coating

You can use the best coating/paint products in the world, but if the surface is not prepared properly before the application, premature failure of the coating and deterioration of the substrate metal is inevitable. Our tank Coating Specialists study each project and determine the optimum approach to surface preparation based on site specific conditions such as tank materials, existing corrosion, humidity and other environmental conditions.

Overhaul / Installation & Commissioning

Stardom Engineering offers the best and most affordable support with our Site Service team available to provide high quality support services as and when required, provide technical support and after-sales services that are in line with our expertise with backup from OEM Partners across the globe.

We have proven track record (Installation & Commissioning – Maintenance, Refurbishment, Overhaul) of Fire water pumps, Heat exchanger, Fire heater package system , Onshore & Offshore Quick Connect Disconnect Coupler (QCDC), Quick Release Offshore Hook, ESD Test(of MLA, QCDC, QRH), specific M E&I Test related to these equipment's.

We trust that with our comprehensive and high quality range of engineering expertise, we would be able to serve our customers' needs and demands

Our experts provide a depth of experience in all aspects of onsite services including but not limited to the following:

- Overhaul of Rotating Equipments
- Installation Services
- Pre- commissioning / Testing of installed plants
- Commissioning & Start-Up assistance
- Equipment Condition & maintenance Surveys
- Optimization of plant Efficiency
- Overhaul & Repair
- PLC Control Modifications

Processcontrol

We specialize in supply and installation of process control instrumentation products and electrical products.

We undertake the following in the electrical fields in both the Hazardous and non-hazardous Environment.

General refurbishment of electrical installations in production platform and rigs Installation of switch gear and controls

Upstream Process Systems and Process Control & Instrumentation Engineering/Offshore Process Mechanical & Piping Engineering

Refurbishment flow lines, onshore/offshore process facilities and other rotating equipment electrical or mechanical

Design of control system packages for your company needs to save your plant downtime and ultimately increasing your production.

Provision of AutoCAD drawings services for your existing systems and electrical wiring diagram. This will allow you to know shutdown requirements and save time and manpower during maintenance.

Installation of transformers, distribution and control panels Laying of steel conduits and cable trays

Laying of cables for lighting, switching and controls for Navigation Maintenance of same in an existing installation.Maintenance of

Motor control centers in switch gears Installation and Maintenance of 3 phase induction and squirrel cage motors, etc.

Calibration of relays, Solenoids in generators

Installation and maintenance of Cathodic protection in above-ground and under-ground pipes and vessels using magnesium oxide as sacrificial anodes or other modern technologies in use.

We provide extensive services in Process control, instrumentation and electrical fields.

Provision of AutoCAD drawings services for existing systems and electrical wiring diagram. This will allow you to know shutdown requirements and save time and manpower during maintenance.

Installation and maintenance of differential pressure gauges, temperature and pressure transmitters on delivery and flow lines.

Installation of instrument and control panels, annunciation panels, etc

Installation and maintenance of differential pressure gauge pressure and temperature, transmitters, on delivery and flows lines

Processcontrol

- Recorders, controllers on metering skids
- Fire detection and alarm synchronizing system
- Telemeter equipment, solenoids, relays
- Calibration and recalibration of instruments
- Supply of valves and accessories.
- Corrosion Control Services
- High Pressure (HP) and Ultra High Pressure (UHP) Hydro-blasting
- Corrosion survey and risk assessment
- Corrosion control in Process systems
- Protection coating and relocating
- Plant and tank cleaning
- Pipeline and storage tank maintenance
- High Pressure (HP) and Ultra High Pressure (UHP) Hydro-blasting – Ultra bar 10E UHP
- Offshore Uni

Offshore & Onshore Crane Maintenance

Stardom Engineering supplies crane parts and carry out crane services. Crane parts and service are available for ship cranes, offshore cranes and mobile cranes. Stardom Engineering also provide hydraulic repairs for crane

SHIP CRANE PARTS & SERVICES

Stardom Engineering provides: Ship crane parts, Ship crane Engineers, Hydraulic repairs, Gearbox repairs, Winch repairs, Crane sales and many other ship and marine crane services for

Asea cranes BLM cranes Dongnam cranes Fukushima cranes Hagglund cranes
Hatlapa cranes Hydralift cranes IHI cranes KGW cranes Liebherr cranes LMG cranes
MacGregor cranes Melcal cranes Mitsubishi cranes NMF cranes O&K cranes Palfinger cranes
SCM cranes Tsuji cranes

Acta, Aker, Allied Marine, Asea, Bergen, Effer, Heila, Hochang, Huisman, Hydramarin, Kawasaki, Krupp, Marlift, Norlift, North Pacific, Norwinch, Palfinger, Towimor, TTS LMG, TTS Marine, TTS Norlift ship crane parts and Engineers are also available.

OFFSHORE CRANE PARTS & SERVICES

Stardom Engineering Services provides: Offshore crane parts, Ship crane Engineers, Hydraulic repairs, Gearbox Repairs, Winch repairs, Crane sales and many other offshore and pedestal crane services for:

Amcyld cranes BLM cranes Bucyrus Erie cranes Favelle Favco cranes Fukushima cranes
Hydralift cranes Italgro cranes Kenz cranes Liebherr cranes Link Belt cranes Manitex cranes
Mape cranes Melcal cranes SCM cranes

Acta, Aker, American Aero, American Hoist, Ateinsa, BMC, Dreco, Dreggen, Effer, Hercules, Houston Systems, Le Tourneau, National, Nautilus, Nor Mar, Norlift, NOV, OS, Patriot, Peregrini, Seahorse, Seaking, Seatrax, Titan, Weatherford, Wolffkran and Unit Mariner offshore crane parts and Engineers are also available.

MOBILE CRANE PARTS & SERVICES

Mobile crane parts for many types of mobile cranes and crawler cranes. Crane parts shipped worldwide. Crane types Available include

American Hoist cranes Bantam cranes Bendini cranes Bucyrus Erie cranes
Coles cranes Demag cranes Drott cranes Galion cranes Grove cranes Heila cranes
Hycr cranes Hydrocon cranes Kato cranes Kobelco cranes Koehring cranes Krupp cranes
LBS cranes Liebherr crawler cranes Lima cranes Link Belt cranes (exl. USA, Canada & UK) Lorain cranes
Manitowoc cranes Mitsubishi cranes National cranes NCK cranes Northwest cranes P&H cranes Pettibone cranes PPM cranes Ruston
Bucyrus cranes Terex cranes Unic cranes Yard Boss crane

Marine Support/tank & Vessel Cleaning

Stardom Engineering has developed a range of technologies and methods using tank cleaning heads, vacuum transfer systems and other pumping solutions to clean tanks and vessels either remotely or with minimum man entry.

Fully Trained, Skilled Workforce

At Stardom Engineering Services our depth of knowledge in confined space and tank and vessel cleaning remains unsurpassed. We have a permanent workforce, fully trained and skilled in the safe working practices associated with confined space and tank and vessel cleaning. Technical support is provided by our experienced management team.

Tank Cleaning Heads

The use of specialist tank cleaning heads provide a remote cleaning solution allow for tanks and vessels to be cleaned with minimal requirement for man entry. We have a range of specialist cleaning heads which can be configured to meet the entry points of the tank / vessel.

Vacuum Transfer Systems and Pumping Solutions

For all confined space and tank and vessel cleaning the preferred solution would of course be one of no-man entry. For this purpose, our range of vacuum transfer systems and pumping solutions can be engineered / configured to Meet the specific scope of work and specific gravity of material requiring removal thus ensuring optimum performance is achieved.

Vacuum Transfer Systems and Pumping Solutions

In the event of a man-entry requirement, our highly trained workforce specializes in all aspects of confined space entry and rescue. Equipped with an extensive range of breathing apparatus and monitoring equipment alongwith water-tight procedures and safe systems of work, ensure that our clients confined space working requirements are safely and efficiently carried out.

All Industries and Applications Covered

Dovewell tank and vessel experience covers a broad spectrum of industries, onshore and offshore Oil & Gas, Petrochemical, Power, Utilities and applications including Cargo Tanks, Mud Tanks, Ballast Tanks, Production Separators, Silos, , Boilers and Septic Tanks.

HSE

There is need for us to live in societies where we can co-exist with other life forms and nature – much of our socio-economic and scientific activities threaten the ecological balance in our world. Of note is the unflinching human demand for land and energy; various activities employed in attaining and exploiting resource; and the development and utility of anti-ecology machinery, product and techniques. Amidst these challenges is the search for cleaner air, save environment and endangered species. Stardom Engineering is developing a fund base – DECT: Stardom Engineering Eco-Care Trust – with the aim of providing funding on ecological care. Our dedication to nature preservation and balance is also a public campaign support and corporate pledge. We abide by international HSE standards in business activities and corporate services on and off oil field service, onshore and offshore, Defense, Power. It is a necessity and common goal to work or a safe and healthy society. Life is all about balance. It is intricate and dynamic.
